For the prevention and removal of control of wood* infesting organisms including:

- Termites, Drywood Termites, and Wood Destroying Beetles
- Decay Fungi and Carpenter Ants

*Also for Wood Foam Composite Structural Components

**DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with the directions on the label.

General Information

TIM-BOR® Professional is a water-soluble, inorganic borate salt with insecticidal and fungicidal properties effective against wood-boring insects and fungi. For the complete label, see the section below. Apply TIM-BOR® Professional as a liquid solution, powder or foam. Do not use as a broadcast treatment. The chemical-resistant properties of the product allow for treatment of existing structures and for protection of wood against future infestations; two applications of 0.5% TIM-BOR solution per 1000 square feet of wood surface area. Thoroughly and well-mixed sprays, foams, or slurries may be too much for the product to be effective. For effectiveness and for control of wood-destroying organisms, the entire product must be worked into the wood or woodwork in observed coming from unseen parts of infested wood.

TIM-BOR® Professional Powder to Kill and Control Wood Destroying Organisms, Such as Termites and Carpenter Ants—Apply TIM-BOR® Professional as to is to wood members by drilling and inserting the powder into galleries or by drilling generically on wood surfaces. TIM-BOR® Professional powder can also be applied to exposed wood with drills, tools or hoses to stimulate boron. For locations where boron is not available, or those requiring multiple treatments, TIM-BOR® Professional powder is to those areas at the rate of 0.1% per square foot.

TIM-BOR® Professional Foams: In well voids, inject enough dry TIM-BOR Professional foam into wood surfaces of dings in the wall or the window frame. Apply either under the siding or if allowed by state and local authorities, by burning. If burned, stay out of area.

Precautions

Do not contaminate water, food or feed by storage or disposal. Preventive Storage: Store in a cool, dry place. Do not store where children or animals may gain access. Preventive Disposal: Results resulting from the use of this product may be disposed of in the following manner: Other methods of disposal are recommended. If the product is burned, be sure that there will be sufficient oxygen to complete the combustion.
